Riverside County Transportation Department, (909) 880-0451

[Palm Drive/Gene Autry Trail Project Entering Final Preparations to Open New Six-Lane Overcrossing](#)

Beginning Monday, February 27, the contractor Skanska will be performing intermittent night-time lane and ramp closures at the I-10 Palm Dr/Gene Autry Interchange. These closures will occur for approximately three weeks. The purpose of these closures is to allow for re-striping and permanent traffic signal relocation which is part of the final stages of the Palm Dr/Gene Autry Interchange Improvement Project. There will also be daytime work that will consist of lane-shifting only. No closures are anticipated in the daytime.

The contractor will complete the remaining work with lane closures.

The contractor will be shifting traffic back and forth from one side of the bridge to the other until all signals and permanent striping is completed. The six-lane bridge will open late March 2012.

Night work hours are: 4:00 pm – 5:00 am

Please plan to leave early and if possible, take alternate routes during this time period. Thank you for your patience while this necessary work is performed.
