FOR IMMEDIATE RELEASE

\$334 MILLION ALLOCATED FOR TRANSPORTATION PROJECTS THAT ENHANCE THE QUALITY OF LIFE AND SUPPORT JOB GROWTH

\$165 million will upgrade bridges, repair rough pavement, and keep pavement in good condition from deteriorating

SAN BERNARDINO – Californians will be driving on smoother roads, safer bridges, and enjoying the benefits of enhanced transit thanks to \$334 million in new funding allocated to 53 projects by the California Transportation Commission.

The allocations include approximately \$165 million to repair bumpy pavement, preserve roads that are in good condition from worsening, and upgrade bridges to make them safer and stronger. Most of California's highways are more than a half-century old, and they carry nearly half of the nation's container freight – heavy loads that pound our highways more than any other state.

“To get the most bang for the buck for taxpayers, Caltrans targets dollars where they are most effective - pavement preservation,” Dougherty said. “Every \$1 spent on preventive pavement maintenance saves Californians \$11 that would have been spent on future pavement repairs.”

Currently, 84 percent, or 42,000 lane miles of California highways are in good operating condition. Caltrans' goal is to reach 90 percent by 2023, which is a challenge as funding is declining and highways are aging. In 2013, Caltrans repaired 76,808 potholes on the Golden State's 50,000 highway lane miles. This was down nearly 100,000 potholes from a few years prior due to Caltrans' repaving efforts.

The allocations also include \$64 million from Proposition 1B, a transportation bond approved by voters in 2006. To date, more than \$17 billion in Proposition 1B funds have been put to work statewide for transportation purposes.

The remaining funding allocations came from assorted transportation accounts funded by state and federal dollars.

Some of the notable projects that received funding support include:

Hathaway Creek Bridge Rehabilitation - Rehabilitate one structure by replacing bridge deck, upgrading bridge rails, and bridge approach slabs to address salt penetration and restore bridge load capacity (\$1.6 million).

Horsethief Creek Bridge Rehabilitation - Replace one structure due to concrete degradation and to restore bridge load capacity (\$5.8 million).

Please see the [attached file for more information](#) about all projects that received allocations.

1	\$4,877,900	City of Los Angeles	LACMTA	07-Los Angeles	City of Los Angeles ATCS-Wilshire East Project. <u>Outcome/Output:</u> The proposed ATCS is a traffic signal control system which provides fully traffic responsive adaptive signal control based on real-time traffic conditions. As traffic patterns change, ATCS has the advantage over existing systems in that traffic signal timing is automatically changed in realtime to match the current conditions. This immediately leads to improvement in the Level of Service (LOS) and reduced traffic congestion, fuel consumption, and air pollution. Results have shown that ATCS provides a minimum of 3% of added capacity as compared to the existing ATCS System.	TLSP	\$4,877,900	0714000172	4	2012-13	104-6064	\$4,877,900
