FOR IMMEDIATE RELEASE

STATE ROUTE 18 MEDIAN PROJECT SET TO BEGIN

SAN BERNARDINO – The California Department of Transportation (Caltrans) plans to begin work on April 11 to install a three beam guardrail for the State Route 18 (SR 18) Median Project between Sierra Way and State Route 138 (SR 138), also known as Crestline Cutoff. The project was put into motion when a higher than average number of cross over collisions occurred on this section of the route.

Caltrans began working with the communities of Crestline and Lake Arrowhead two years ago regarding the installation of a concrete median barrier. During those discussions it was decided that there would be hydrology issues with water and ice runoff if a solid concrete median was installed. It was determined that a three beam guardrail (see photo below) would mitigate some of those issues in addition to minimalizing future maintenance and repairs.

The \$4 million project was awarded to Alcorn Fence Company. The guardrail installation will require the left lane, or one of two lanes, closed in both directions of SR 18 in two mile increments during work hours, Monday through Thursday, 8:00 a.m. to 5:00 p.m. and on Fridays from 8:00 a.m. to 3:00 p.m. Work is expected to begin at the top and bottom of SR 18 in the “four lane” section and move toward the middle. Traffic impacts are expected to be minimal but motorists are advised to add a little extra commute time to avoid any unforeseen delays.

Caltrans and the California Highway Patrol (CHP) want to inform the public that the speed limit will be reduced within the project limits from 55 MPH to 45 MPH to enhance safety for the workers and motorists. Be advised that traffic citations within construction zones can be subject to double fines.

Caltrans worked closely with law enforcement and emergency responders to determine ten (10) strategic access points along the nine-mile stretch where the guardrail will be placed. Five animal crossing locations have also been designed into the project. The work is expected to be complete by winter 2016 (weather permitting).
