Traffic Signals active at I-15 and Cantu-Galleano

RIVERSIDE COUNTY – The California Department of Transportation (Caltrans) will be energizing the traffic signals on the new Cantu-Galleano interchange tomorrow, July 19, 2007. Construction of the interchange was a locally funded project by the County of Riverside.

Watch for the new signals as you drive through the interchange! Be prepared for traffic control.

Avoid delays and frustration by making room for other cars and by merging early. For information on transportation projects within Riverside and San Bernardino Counties visit our web site at [Caltrans8 info](http://Caltrans8.info).
