

NOTICE OF CONSTRUCTION

Southern California Edison West of Devers (WOD) Upgrade Project Activity

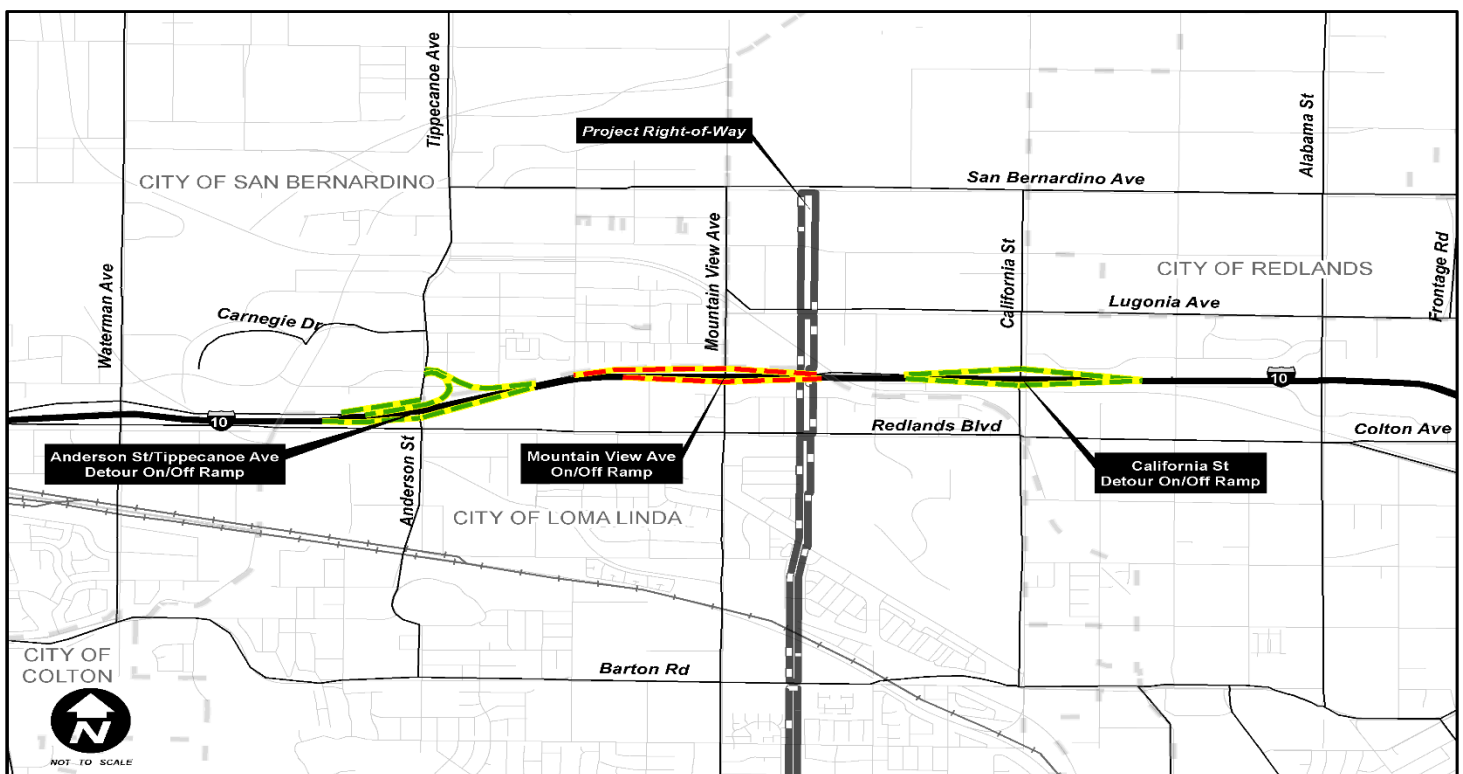

Southern California Edison (SCE) is building the West of Devers Upgrade Project to provide the additional capacity necessary to bring renewable and conventional generation being developed in desert areas around Blythe and Desert Center, California. These significant upgrades will enhance electric reliability for all customers and help to make the power grid greener for California.

Scheduled Activities: SCE will be removing overhead lines. Temporary traffic breaks will be occasionally required to facilitate the work.

Interstate 10 Mountain View Avenue Ramp Closures: The east bound on ramp and west bound off ramp at Mountain View will be closed May 29th through June 2nd from 6:30 am to 6:30 pm.

Detours: Detours will be in place. West bound traffic is encouraged to use the California Street off ramp. East bound traffic is encouraged to use Anderson Street / Tippecanoe on ramp.

Every effort will be made to reduce the amount of noise generated by activities related to construction. SCE understands that construction may be inconvenient to residents, businesses, and visitors. We greatly appreciate your patience as we move to complete construction as quickly and safely as possible.
